Gdynia 06.05.2022

Dear Partners and Clients,

According to the message received from Polish Railway Management, PKP PLK, we feel obliged to inform that on 09.05 the track No. 2 on the Rzepin - Toporów line will be closed. Renovation works on the indicated section are to last at least for next two weeks. After this period, some closures will still be maintained, however, according to PKP PLK's assurances, they should have less impact on the general rail traffic.

Due to the above, we were forced to adjust the timetables of our international connections. Some trains had to be canceled, while few others will be rerouted to longer routes. Timetable's details will be sent by our Customer Service Department.

Despite the preparation of alternative timetables, we can still expect delays in transport due to congestion on the routes and a smaller number of trains, which will reduce space availability.

Please take the above into account when planning your next shipments.

Note that decisions of Polish Rail Management to close railway lines, difficulties and limitations of infrastructure's capacity, are external factors, independent of PCC Intermodal S.A. However, we assure you that we will make every effort to ensure that the transport organized by us is carried out as quickly and efficiently as possible.

PCC Intermodal S.A.
